Subject index

accidents;analysis of patient 141
accreditation;preparation for hospital 157
acute hospital services;variation in admissions and length of stay in 17
admission rates;variation in, effect on quality improvement and cost reduction 17
anaesthesia;National Confidential Enquiry into Peri-operative Deaths 13
antibiotic policy;resulting from a quality assurance program 69
asthma, acute;chest X-ray in childhood 153
audit;of hospital practice for laryngotracheo-bronchitis 63
Australian Council on Healthcare Standards;a history 101

chest radiology;in childhood acute asthma 153
clinical chemistry laboratory;introduction of quality management to 3
community care;continuity of, following discharge 39
continuous quality improvement;in a clinical chemistry laboratory 3
cost reduction
  by use of endoscopic photography in patient care 23
  effect of variation in admissions and discharges on 17
croup;an audit of hospital practice 63

death certification;educational intervention to improve 185
diagnosis related groups;effect of input error on 127
discharge management;continuity of community care following discharge 39

editorial 1, 53, 99, 151
educational intervention;to improve death certification 185
endoscopic photography;a cost-effective adjunct to patient care 23

hospital
  accidents;analysis of 141

accreditation;introduction of in Australia 101
practice;audit of, for laryngo-tracheo-bronchitis 63

implementation;of a unit-based quality assurance approach 111
input errors;effect on diagnosis related groups 127
introduction;of total quality management in an area health board 133

laryngo-tracheo-bronchitis;an audit of hospital practice 63
length of stay;variation in, effect on quality improvement and cost reduction 17
litigation;quality management to minimize 75

maternity care;quality assurance of 119
medical technology
implications of minimally invasive therapy 83
introduction and use of minimally invasive therapy 89
minimally invasive therapy
implications of 83
introduction and use of, in Australia 89

National Confidential Enquiry into Perioperative Deaths 13
New South Wales;pathology testing in public hospitals in 165
New Zealand Area Health Board;introduction of total quality management to 133
nursing care;quality assurance in 175

obstetrics;quality assurance of maternity care 119
occurrence screening;in preparation for hospital accreditation 157
operating theatre;pressure care survey in 29
outcome assessment
and death certification performance 185
of maternity care 119

pathology testing;use in NSW public hospitals 165
patient care
endoscopic photography as a valuable adjunct to 23
survey of pressure care in operating theatres 29
patient falls;analysis of, in hospital 141
peri-operative mortality;National Confidential Enquiry into 13
pressure area development;survey following major surgery 29
professional organizations;framework for quality assurance in 55
public hospitals;use of pathology testing in 165

quality assessment;of care continuity between hospital and the community 39
quality assurance
and achievement of quality nursing care 175
and hospital accreditation 157
and patient falls in hospital 141
framework for, in professional organizations 55
in maternity care 119
implementation to a unit-based approach 111
leading to a hospital antibiotic policy 69
quality improvement;effect of variation in admissions and discharges on 17
quality management
in minimizing litigation risk 75
introduction into a clinical chemistry laboratory 3

risk management;through quality assessment 75

skin integrity;pressure area development following major surgery 29
surgery
development of pressure areas following major 29
National Confidential Enquiry into Perioperative Deaths 13

total quality management
introduction into a clinical chemistry laboratory 3
introduction in an area health board 133

unit-based quality assurance;implementation of 11
